## **From Principal's Desk:**

"Education is the most powerful weapon which you can use to change the world."? Nelson Mandela.

Education is the manifestation of love and my most cherished possession. Education drives away ignorance and through illumination it emboldens a man to a righteous thought and action. It empowers a woman and enlarges the horizon of his mind. It energizes a society and enables a man to earn his living with respect and praise. Hence my love for it.

In order to accomplish our vision and mission, we are prepared to take as much effort as possible for the betterment of academic scenario in India. We believe that education is an effective medium of social transformation. We get encouragement, looking at bright and successful careers of our thousands of students, which subsequently benefit the society. We feel proud that we are part of such an excellent institute, which is shaping modern India.

Our college cares for the individual development of each and every student. We follow “mentor system” under which each class is put into the multi-pronged web of a teacher. We accord prime importance to the behavioural discipline, moral integrity and cognitive developments of our students. Our teachers strive to teach not only academic programmes but also life skills needed for students’ self-development with highly resourceful faculty.

Dr. R. Kandasamy,  
Principal

## **From HOD's Desk:**

I am very happy that our Electronics & Communication department is releasing this newsletter forerunner of department activities. It is a technical platform to bring out the hidden talents of students and faculty. The major strength of the department is a team of well qualified and dedicated faculties who are continuously supporting the students for their academic excellence. Now we are almost at the end of the academic year. University exams are going to start from April onwards. It is the time for us to work hard for getting good results in exams and getting placements from various companies.
